

Arnold Masselin

Junior Developer

After the completion of a Master’s Degree in Public Law and 5 years as a Buyer at GRDF, I decided to become a developer to pursue my passion for logic, algorithms and technology.

<Skills>

/Back-end/

- > PHP
- > SQL
- > Symfony
- > Java
- > Python
- > API Rest

/Front-end/

- > JS
- > React
- > Tailwind
- > HTML
- > CSS

/Transversal/

- > OOP
- > Database & UML Modeling
- > Tests
- > Agile methodology

<Tools>

- > Git
- > Postman
- > Figma

Professional Experiences = [

Jan 2025 => Data engineer, Labelium

- > Setting up Datastreams to retrieve marketing data from multiple sources, processing and cleaning via SQL, hosting via BigQuery, and using/filtering through Looker and Gsheet.
- > Design and implementation of automation scripts in the google environment

Jan 2025 => Volunteer, Front-End Developer, React, GROG

during my spare time: Front-end developer working on building the V3 of a role-playing game association’s website.

Apr-Jul 2024 => Internship, Front-End Developer, React, The Hoard

Worked on "Minis-Printer" website using React for a tabletop gaming accessories company (Dungeons & Dragons), featuring image processing and printing.

feb-Apr 2024 => Internship, Back-End Developer, Java, Numerilis

Backend updates for a banking software in Java/SQL to comply with regulations.

2018-23 => Buyer, GRDF

Customer needs formulation, purchasing strategies, implementation and follow-up of calls for tenders, commercial and contractual negotiations. Notable projects:

- > Management of the digital purchasing family: SaaS solutions, digital consulting services, IT consulting.
- > Gas procurement during wartime.
- > Purchase and logistics of COVID-19 products during the pandemic.

];

Projects = [

Repo-Helper => Remote repository management software developed by a team of two using Python.

Minis-Printer [Check Website](#) => Website built with React for a role-playing game accessories company (Dungeons & Dragons) that handles image processing and printing.

Portfolio [Check Website](#) => Personal website showcasing my profile, coded with React + Tailwind CSS for the frontend and Node for the SMTP server on the contact page. Images created with Figma.

Origins Digital => School project completed in 8 weeks: a VOD site developed with Symfony and SQL, featuring user account management and an online payment interface via Stripe API.

Cyclaid => School project completed in 5 weeks: mobile site for sharing bike spare parts, developed in PHP and SQL following an MVC architecture.

];

Education = [

2023-24 => Web Developer Bootcamp specialized in Back-End development, Wild Code School

2018-19 => Master’s in Procurement Management, Kedge Business School

2016-17 => Dual Master’s in Public Economic Law, University Paris X

];
